## G624130-D

# Spectra i.Net Data/Audio Router Enclosure (MODEL: G624130-D)

### FUNCTION

The Lencore Spectra i.Net® data router enclosure ensures quality data, paging and audio transmission across long cable runs. Each data router enclosure terminates and rebroadcasts signals back to full strength allowing the Spectra i.Net® system wiring network to be extended.

- The unit boosts and amplifies i.LON, music and paging signals.
- Enclosure has an on/off switch
- The unit also compensates for high frequency loss due to cable length.

### NOTE

Never plug a Spectra i.Net® router into any computer or network or like device other than Spectra i.Net® equipment as damage to a computer or like equipment could occur.

### DIMENSIONS

+ h 12" x w 20" x d 7"

### POWER REQUIREMENT

+ Enclosure is plugged into a 120VAC outlet

### INPUTS/OUTPUTS

- + Data CAT 5e RJ45
- + Audio CAT 5e RJ45
