G625130

n.FORM™ Data/Audio Router Enclosure (MODEL: G625130)

FUNCTION

The Lencore n.FORM™ data & audio router enclosure ensures quality data, paging and audio transmission across long cable runs. Each data router enclosure terminates and rebroadcasts signals back to full strength allowing the n.FORM™ system wiring network to be extended.

- The unit boosts and amplifies i.LON, music and paging signals.
- Enclosure has an on/off switch
- The unit also compensates for high frequency loss due to cable length.

NOTE

Never plug an n.FORM™ router into any computer or network or like device other than n.FORM™ equipment as damage to a computer or like equipment could occur.

DIMENSIONS

+ h 24" x w 20" x d 7"

ROUTER INPUT VOLTAGE

- + 16-24 VAC or VDC (INPUT 1)
- + 24-48 VAC or VDC (INPUT 2)

POWER REQUIREMENT

+ Enclosure is plugged into a 120VAC outlet

INPUTS/OUTPUTS

- + Data CAT 5e RJ45
- + Audio CAT 5e RJ45
